

## Code Search

Note: Information used to complete examples is fictitious.

In this tutorial, you will learn how to access and use the code search database.

There are three ways to access the code search database.

1. Click the **Code Search** link from the TAR menu.
2. Click the **Code Search** link from the navigation bar on the left-hand side of the page within Online TAR Applications.

**Service Information**

\* [Service Code](#) (HCPCS or FQHC Per Visit Code)

\* Total Unit

\* From Date

mmddyy

Discharge

\* Admit From

+ [ICD-9 Code](#) (Decimal Required)

+ Diagnosis Description (40 characters accepted)

Date of Onset

mmddyyyy

There are three ways to access the code search database.

3. Click the underlined link above the field requiring a code when completing an eTAR.

Example: Click the **Service Code** or **ICD-9 Code** link to search for the code related to the service being requested.

3. Click the underlined link above the field requiring a code when completing an eTAR.

Example: Click the **Service Code** or **ICD-9 Code** link to search for the code related to the service being requested. There are three ways to access the code search database.

**Create a [New TAR](#)**  
Create a New Treatment Authorization Request using internet form submission.

**[Update an existing TAR](#)**  
Update an existing Treatment Authorization Request and update attachments.

**[Upload attachments](#)**  
Upload attachments for an existing Treatment Authorization Request.

**[Inquire on a TAR](#)**  
Inquire on a Treatment Authorization Request's status.

**[View Response](#)**  
View Treatment Authorization Request response.

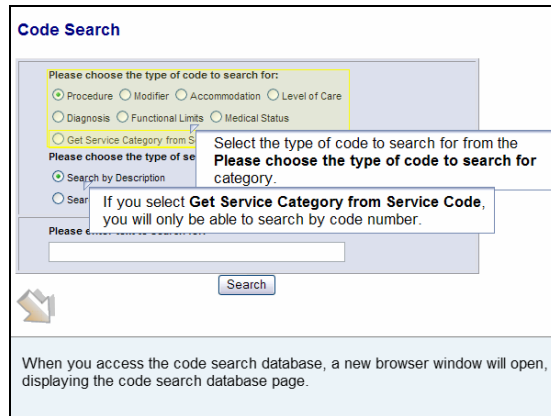

**[Code Search](#)**  
Search for procedure, modifier, accommodation, level of care, diagnosis, functional limits, medical status, or service category.

For this example, we will be accessing the code search database from the TAR menu.

Click the **Code Search** link from the TAR menu.

For this example, we will be accessing the code search database from the TAR menu.

Click the **Code Search** link from the TAR menu.

**Code Search**

Please choose the type of code to search for:

☒ Procedure ☐ Modifier ☐ Accommodation ☐ Level of Care

☐ Diagnosis ☐ Functional Limits ☐ Medical Status

☐ Get Service Category from Service Code

Please choose the type of search:

☒ Search by Description

☐ Search by Code

Select the type of code to search for from the **Please choose the type of code to search for** category.

If you select **Get Service Category from Service Code**, you will only be able to search by code number.

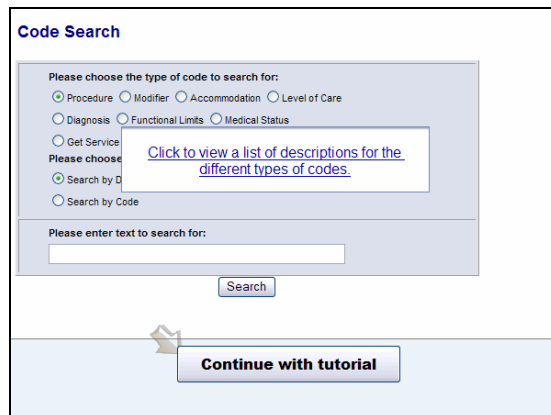

Please enter text to search for:

When you access the code search database, a new browser window will open, displaying the code search database page.

When you access the code search database, a new browser window will open, displaying the code search database page.

Select the type of code to search for from the **Please choose the type of code to search for** category.

If you select **Get Service Category from Service Code**, you will only be able to search by code number.

**Code Search**

Please choose the type of code to search for:

☒ Procedure ☐ Modifier ☐ Accommodation ☐ Level of Care

☐ Diagnosis ☐ Functional Limits ☐ Medical Status

☐ Get Service Category from Service Code

Please choose the type of search:

☒ Search by Description

☐ Search by Code

[Click to view a list of descriptions for the different types of codes.](#)

Please enter text to search for:

Click to view a list of descriptions for the different types of codes.

**Code Search**

Select the type of search you would like to perform from the **Please choose the type of search** category.

☐ Get Service Category from Code

**Please choose the type of search:**

☒ Search by Description

☐ Search by Code

Select **Search by Description** when the service code is not known.

Select **Search by Code** to verify the description of the code.

**Please enter text to search for:**

Type the searchable text in the **Please enter text to search for** field.

Select the type of search you would like to perform from the **Please choose the type of search** category.

Select **Search by Description** when the service code is not known.

Select **Search by Code** to verify the description of the code.

Type the searchable text in the **Please enter text to search for** field.

**Code Search**

**Please choose the type of code to search for:**
